

# slotsforbingo

&lt;p&gt;There are 5 columns and 15 possible numbers in each column. In the standard bingo game&lt;/p&gt;  
&lt;p&gt;The 75 Number, The number is distributed across to five Columns from A down to E that&lt;/p&gt;  
&lt;p&gt;ensures an Equal chance for every number to be called! This is achieved by using a random number generator of selection for each bingo card so that there is an equal chance&lt;/p&gt;  
&lt;p&gt;of any number being called. How are numbers calculated on a bingo card so that&lt;/p&gt;  
&lt;p&gt;each number is called once&lt;/p&gt;
